Arrangement of Keynotes & Oral Presentation

MiTA2024

The keynotes and oral presentation will be held both onsite and online via Zoom Meeting.
https://victoriauniversity.zoom.us/j/89571304470?pwd=XrTBMia5jriLo5T675QIvYW6mIAi0d.1
Melbourne time*: 10:00 am - 18:30 pm
Onsite Venue: City Campus of Victoria University, Melbourne, Australia.

July 15, 2024 Monday		
10:00-11:00		**Opening Ceremony in Melbourne** & **Keynote Title**: Evolutionary Framework for T-Closeness Anonymization **Keynote Speaker**: **Prof. Hua Wang,** Victoria University, Australia, Chair of MiTA2024 **Onsite Venue:** Room CTY-ROGL02 L/T, City Campus of Victoria University, Melbourne, Australia.
Onsite Presentation		
11:15-11:30	22	Improving Speech Emotion Recognition with Dynamic Features and Temporal Correlations
11:30-11:45	41	Binary Gannet Optimization Algorithm for Feature Selection Problem
11:45-12:00	14	A Novel Three-Phase Feature Selection Algorithm for Major Depressive Disorder Classification
12:00-13:00	**Lunch Break**	
14:00-14:15	Zhejiang Normal University 2024 Australian Recruitment Announcement	
14:15-14:30	15	Securing UAV Delivery Systems with Blockchain and Large Language Models: An Innovative Logistics Solution
14:30-14:45	56	Orthogonal Design Assisted Particle Swarm Optimization
14:45-15:00	47	A Variation-Based Genetic Algorithm for Privacy-Preserving Data Publishing
15:00-15:15	51	A new decomposition method for fully non-separable large-scale problem
15:15-15:30	40	A Dynamic Heuristic Set-based Particle Swarm Optimizer for the Multi-Objective Task Assigning Problem in Wireless Sensor Networks
15:30-15:45	53	Advancing MobileNet Security: Weighted Adversarial Learning in Convolutional Neural Networks
15:45-16:00	**Tea Break**	
Online Presentation		
16:00-16:15	5	Rumor Detection by Jointly Learning Propagation Patterns and Users' Personas
16:15-16:30	7	LASE: A Forward-Looking Item Selection Strategy for CD-CAT
16:30-16:45	44	AI-assisted Cooking Teaching System
16:45-17:00	24	Research on the Technology Architecture of Full-stack Cloud-Native Hosted Cloud
17:00-17:15	8	Decoding Domain-Specific NER: A Performance Evaluation of ChatGPT, Bi-LSTM, and BERT
17:15-17:30	10	Voiceprint Challenge for Cryptographic Authentication Based on Triplet Networks and Fuzzy Extractors
17:30-17:45	45	Can Individuals be Repeatedly Selected for Mutation in Matrix-Based DE? A Comparative Study
17:45-18:00	25	Scene Recognition Based on An Improved DenseNet with Attention Mechanism
18:00-18:15	4	A Multiobjective Ant Colony System for Multi-Agent Pickup and Delivery

The keynotes and oral presentation will be held both onsite and online via Zoom Meeting.
https://victoriauniversity.zoom.us/j/89571304470?pwd=XrTBMia5jriLo5T675QIvYW6mIAi0d.1
Melbourne time*: 10:00 am - 18:30 pm

July 16, 2024 Tuesday		
10:00-11:00		**Keynote Title**: Challenges in Artificial Intelligence and Cybersecurity **Keynote Speaker**: **Prof. Peng Shi**, University of Adelaide, Australia Editor-in-Chief of IEEE Transactions on Cybernetics **Onsite Venue:** Room CTY-ROGL02 L/T, City Campus of Victoria University, Melbourne, Australia.
Onsite Presentation		
11:15-11:30	1	Surrogate-Assisted Level-Based Learning Particle Swarm Optimizer Based on Expected Value Evaluation under High Noise Optimization
11:30-11:45	55	A Novel Evolutionary Algorithm for Multiple Traveling Salesman Problem Containing Targets with Multiple Visits
11:45-12:00	21	Parallel Multi-stages Rectification Networks for 3D Skeleton-based Motion Prediction
12:00-13:00		**Lunch Break**
14:00-14:15	16	Collision-Aware Evolutionary Algorithm for Multi-Agent Coverage Path Planning
14:15-14:30	50	Adapted Genetic Algorithm for Orienteering Problems
14:30-14:45	28	DNA-encoded design of arithmetic optimization algorithm fused with whales
14:45-15:00	11	A Performance Investigation of Genetic Algorithm with Different Evolutionary Operators
15:00-15:15	19	Competition-Based Stochastic Learning Particle Swarm Optimization Algorithm for Large-Scale Optimization Problem
Online Presentation		
15:15-15:30	26	Benchmark for Multiple Traveling Salesman Problem with Visiting Constraints
15:30-15:45	3	Enhancing Cross-Community Diffusion Through Swarm Intelligence
15:45-16:00	**Tea Break**	
16:00-16:15	12	Crowdsourcing Logistics Scheduling Based on An Ant Colony System Approach
16:15-16:30	42	Ant Colony Optimization for Multiple Traveling Salesmen Problem with Revisitable Cities
16:30-16:45	39	Hilbert-encoded Cooperative Coevolutionary Genetic Algorithm for Few-shot Learning
16:45-17:00	27	Multi-strategy fusion enhanced dung beetle optimization algorithm
17:00-17:15	20	Pheromone Matrix Eigenvalue-based Convergence Assessment Indicator for Ant Colony Optimization
17:15-17:30	46	An Ant Colony System Algorithm for Multiple Traveling Salesman Problem with Hub Cities
17:30-17:45	43	Adapted Ant Colony Optimization for Team Orienteering Problem
17:45-18:00	38	A Set-based Genetic Algorithm for Influence Maximization on Social Networks
18:00-18:15	32	Population-Level Hybridization between Roulette Wheel Selection and Tournament Selection for Particle Swarm Optimization

* Melbourne time.

The keynotes and oral presentation will be held both onsite and online via Tencent Meeting.

Conference Time：2024/07/19 08:30-09:30 (Melbourne time)

https://meeting.tencent.com/dm/NAYJaLyN8b
 # Meeting: 346-450-089

July 19, 2024 Friday	
8:30-9:30	**Keynote Title**: **Iterated Clique Reduction in Vertex Weighted Coloring for Large Sparse Graphs** **Keynote Speaker**: **Prof. Kaile Su**, Griffith University, Australia **Onsite Venue:** Room Tiered Theaterette, Brisbane Square Library, Brisbane, Australia.
